

Artistveda

A School of Photography

PROFESSIONAL

Photography Institute

Our objective is to provide state-of-the-art online/offline professional photography courses of the highest standards.

Our Vision

Artistveda seeks to provide the highest level of distance education training in the art and technique of photography, utilizing multimedia training materials developed by our team, while providing exceptional service and support to every student.

We empower students to achieve their self-improvement goals through flexible, convenient, affordable, and highly relevant programs of study. We support different learning styles through a variety of professional multimedia materials and a student advisor program. With affordable tuition, our goal at Artistveda is to offer the highest level of training in each program to learners worldwide.

About The Coach

Krishna Patil is an accomplished commercial photographer based in Mumbai, with nine years of experience in the field. Despite holding a degree in commerce from Mumbai University, Krishna has pursued his passion for photography with great zeal. Alongside his professional photography work, he has been imparting photography education to aspiring students for the past few years.

Krishna has a unique teaching style that caters to each student's specific needs. He takes the time to understand his students' backgrounds and familiarity with photography concepts, allowing him to design customized sessions that are easy to comprehend. Krishna makes technical concepts simple to understand by using straightforward language and relatable examples, making it possible for students from all educational backgrounds to master the art of photography with ease. Additionally, Krishna offers offline coaching for students who live nearby. With his series of lectures, mastering the skills of photography becomes effortless and enjoyable.

Fundamentals Of Photography

English/ Hindi/ Marathi

The Fundamental of Photography program covers a duration of 4 Weeks. This program is aimed at students who wish to study professional photography in a very rapid and intensive way. The course is available in 3 languages i.e. Marathi, English & Hindi.

As a photographer, you will need to master the technical basics of the camera and form an understanding of the kind of equipment you need. The Fundamentals of Digital Photography will also teach something even more important (and crucial for success) – how to bring your creative vision to fruition.

On this course you will learn -

How to bring together the elements of manual mode to create an evocative image:

Shutter speed, aperture, and image composition.

How to choose the right gear, and develop efficient workflow.

How to recognise and take advantage of beautiful natural light.

After this class, you'll consistently shoot stunning photos that get noticed.

You don't need to know every single setting on your DSLR to take good photos. Knowing the basics and learning to switch from automatic mode to manual will transform your images and give you the confidence in your own ability to get out there and start taking more great photos. In this course, you will learn the six essentials that will get you confidently creative images in manual mode.

Learn to capture photographs to be proud of with just your compact camera.

Take impressive portraits, family and group shots, landscapes, night time images and creative macro photos. We will explore each setting on your camera and teach you not just how, but also when to use them. If you've become baffled by the multitude of settings on your compact camera or you struggle to get the results you want, this course is perfect for you. We will teach how to operate the various features of your digital camera, and how to take the right shot for every occasion.

Comprehensive Of Photography

English/ Hindi/ Marathi

The Comprehensive Photography course covers a range of topics in a duration of 6 weeks. This program is aimed for students who wish to start off with their photography journey in a very rapid and intensive way.

As a photographer, you will need to understand and master the basics of the camera and the kind of equipment you would need to achieve your goal. The Comprehensive Photography Course will also teach you the basics of how to edit your pictures in Photoshop and how to make them look livelier.

On this course you will learn -

How to bring together the elements of manual mode to create an evocative image?

Shutter speed, aperture, and image composition.

How to choose the right gear, and develop efficient workflow?

How to recognize and take advantage of beautiful natural light?

How to set up Photoshop for your regular photo editing work and make your photos look like a masterpiece.

After this class, you'll consistently shoot stunning photos that get noticed.

Although you would be taught every setting on the DSLR in this course, knowing and getting well acquainted to it is a slow process and we would be mainly focusing on the major shift i.e., from auto mode to manual mode and all that is required for that transition. We can assure you that after the completion of this course, you would not only be clicking random pictures on manual mode but would also be clicking creative shots that would get noticed.
